

## PRESS RELEASE

Paris, 25<sup>th</sup> September 2019

### FIXED AND MOBILE HIGH-SPEED BROADBAND JULY - AUGUST 2019

**High-speed broadband leader SFR continues its roll-out:  
4G : 21 cities opened 4G+ 500 Mbit/s  
Fiber<sup>1</sup> : 13.8 million Fiber connections**

#### Mobile high-speed broadband

- 924 new 4G antennas deployed until end of August 2019
- In the month of July and August, 4G coverage was brought to 145 towns and 4G+ coverage was brought to 707
- 4G+ 300 Mbits/s was deployed in more than 2,000 towns
- 21 cities are opened in 4G+ 500 Mbit/s

#### Fixed high-speed broadband

- Fiber<sup>2</sup> infrastructure provider, with 13.8 million eligible FTTx connections
- 415,805 new connections across 356 towns in July and August 2019
- The deployment of the Fixed high-speed in le Gard : the Fiber is coming in 48 towns
- SFR Box 8 : the first box on the market to incorporate WiFi 6

#### Mobile high-speed broadband:

##### 924 new 4G antennas deployed until end of August 2019

In July-August 2019, SFR continued the extension of its 4G network by bringing 127 additional sites into service. With the deployment of 924 new antennas during summer 2019, SFR has now 41,537 antennas. In the first quarter of 2019, SFR covered 98.7% of the population in 4G

##### In the month of July and August, 4G coverage was brought to 145 towns and 4G+ coverage was brought to 707

In July-August, SFR brought 4G to 145 additional towns, and 4G+ to 707 towns. For example *Jullouville (50)*, *Saint-Menehould (51)*, *Monchecourt (59)* and *La Chapelle-en-Serval (60)*, have

enjoyed the arrival of 4G, and *Burie (17)*, *Lostanges (19)*, *Berville-sur-mer (27)* and *Colembert (62)* have benefited from 4G+. (See lists below).

### 4G+ 300 Mbits/s was deployed in more than 2,000 towns

SFR continues its investments which will bring 4G+ of up to 300 Mbit/s to its clients, allowing a theoretical maximum speed 3 times faster than 4G. This technology is already being rolled out in 32 major urban centres (of more than 100,000 residents) across a total of 2,061 towns (See lists below).

### 21 cities are opened in 4G+ 500 Mbit/s

In the first quarter of 2019, SFR took an important new step. After *Bordeaux*, *Lyon*, *Saint-Etienne*, *Marseille*, *Toulon*, *Nice*, *Montpellier*, *Avignon*, *Nantes*, *Tours*, *Paris*, *Strasbourg*, *Clermont-Ferrand*, *Angers*, *Rouen*, *Rennes*, *Bayonne-Anglet-Biarritz*, *Brest* and *Dijon* SFR continues its deployment in the 4G+ 500 Mbit/s with the launch this month of *Grenoble* and *Orléans*

Therefore, customers using a fixed rate 4G plan and a compatible device will benefit from considerably increased data rates at no extra cost and will thereby be able to increase, as they wish, their digital usage when mobile.

4G+ up to 500 Mbit/s is a progression from the standard 4G. Thanks to the aggregation of 4 x 4G frequency bands, 4G+ up to 500 Mbit/s is capable of providing a theoretical maximum speed of 593 Mbit/s, thereby offering unequalled comfort and navigation speed for the user on the go.

## **Fixed mobile high-speed broadband:**

### **Fiber<sup>3</sup> infrastructure provider, with 13.8 million eligible FTTx, SFR deployed 415,805 new connections across 356 towns in July-August 2019**

In July and August 2019, SFR continued its deployments across the country, and 415,805 residences and local professionals were made Fiber-connectable in 356 towns.

Among those, 312 have received Fiber for the first time, for example *Charly-sur-Marne (02)*, *La Jarrie (17)*, *Poulligney-Lusans (25)*, *Obernai (67)* and *Guignes (77)* (See lists below).

Currently, SFR's Fiber<sup>4</sup> services are available in more than 3,500 French towns and more than 2,700 towns enjoy speeds of up to 1Gbit/s.

### **The deployment of the Fixed high-speed in le Gard : the Fiber is coming in 48 towns**

The Department of Le Gard and SFR inaugurated on July 8 in Vauvert the first Fiber optical node as part of the deployment of Wigard Fibre. Thus 6,179 households and businesses will be connected to Vauvert very high speed starting this year. With the THD everywhere and for all, 257,000 homes and businesses of Le Gard will be connected to fiber optics by 2022.

### **SFR Box 8 : the first box on the market to incorporate WiFi 6**

After its premiere presentation on July 18, 2019, SFR launched the August 20 commercialization of the SFR Box 8. Equipped with an image and a cinema sound as well as a voice assistant, the SFR Box 8 is the first box on the market to incorporate WiFi 6, the latest generation of WiFi, three times more efficient than the previous one:

- a theoretical cumulative max WiFi rate multiplied by 3.6
- optimal coverage of all rooms in the home thanks to smart WiFi and future WiFi repeaters

Coupled with the power of the SFR network, France's Very High Speed Broadband infrastructure with 13.8 million eligible FTTx, the SFR Box 8 offers an unparalleled Internet experience.
